Castine adds new hires, expands offices

April 18, 2019

RIDGEWOOD, NJ, April 18, 2019

In response to increased demand for its software solutions, Castine has added to its implementation and support teams in both Ridgewood (New Jersey) and London.

“We’re delighted to expand our implementation and support teams with such experienced, industry-expert, professionals.” said Robin Hodgkins, President of Castine. “We’re fortunate – in a knowledge economy, our ability to develop and deliver compelling and innovative software solutions attract folks of extraordinary caliber.”

Castine’s hiring is driven by growth in the adoption of its C3 suite for broker dealers, as new clients come on board and existing clients expand their use of the suite, adding modules and users. C3 provides expert solutions for trader/rep compensation, research pricing/interactions tracking/invoicing, compliance management and KYC/AML, rate card visualization and client profitability reporting and analysis.

Castine has also expanded its offices to accommodate its team and expected further growth. “We’re having a lot of fun” says Tom Smith, Castine’s EVP. “There’s nothing more satisfying than exceeding client expectations. We’re enormously proud of our people and absolutely delighted with our new team members.”

About Castine

The Castine C3 platform of integrated modules lets clients focus on specific areas where gains can be quickly realized with the confidence that the suite can grow as their needs change.

Modules include compliance; commission management, research consumption, pricing, and reviews; trader and adviser compensation.

Offices in New Jersey, London, and Buenos Aires
